
By 2040, around one quarter of all animal species on Earth would have gone extinct due to rising global temperatures.

INITIATIVE

DH52 LIU SHENGRUI

Make D'switch to reusable cups to save D'environment!

- We consume a drink a day from our drink stalls on average
- amounts to more than 2000 plastic cups discarded EVERY DAY
- By bringing our own reusable cups, we can cut down on our plastic waste together
- Let us do our part to curb plastic use in our school, and conserve the environment
